Setra Systems RoHS Statement

The European Union has requested compliance to two environmental directives for all manufacturers that are shipping products into Europe. They are:

1. Restrictions on Hazardous Substances (**RoHS**) - **Directive 2002/95/EC** limits the use of specific substances in manufactured products being sold into the Europe Union
2. Waste Electrical and Electronic Equipment (**WEEE**) regarding product recycling requirements

Setra Systems is committed to meeting these initiatives and ensuring compliance with relevant laws. Our positions on the above referenced directives are as follows:

WEEE

In compliance with the WEEE Directive, we are labeling product's documentation and/or the products themselves with the "wheelie symbol" (shown below). This symbol will be applied to all products that may be purchased for use in the European Union.

RoHS

At this time, our products fall under Category 9 and are exempt from the RoHS initiative. However, our position is to convert all of our products to meet the RoHS initiative throughout this year and next. We have already released several products with RoHS compliance and have a schedule for converting our remaining products. Any new products being introduced this year will be RoHS compliant!

If you have any questions or specific product timing requirements please contact our application engineers with the specific model name and we'll work with you to meet your needs.

Yours sincerely,

Setra Systems
