Model SRF612

Wireless Temperature Transmitter

The SRF612 is used for wireless temperature measurement inside applications like refrigerators, freezers, and incubators. Up to four (4) external temperature sensor probes and a door contact sensor can be connected to one SRF612 Wireless Temperature Transmitter.

Probes and accessories are purchased separately. Please refer to Setra's website or the SRF600 Wireless Probes and Accessories Data Sheet.
If you wish to connect 2, 3 or 4 sensor probes to the SRF612 Wireless Temperature Transmitter, you need to purchase a SRF600 ADTR1.
