

# Setra CEMS™

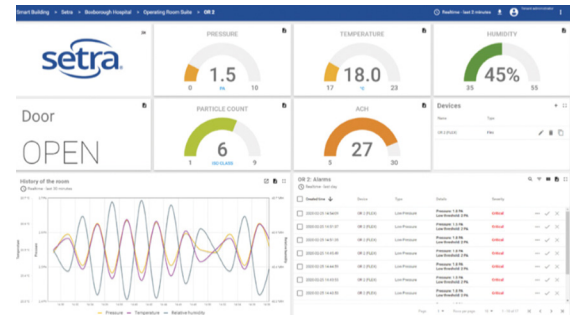

## Continuous Environmental Monitoring System

Real-Time Environmental Monitoring for your Critical Spaces and Cleanroom Environments

## Monitor, Trend, & Alert with CEMS Software

Setra's CEMS software collects real-time data from in-room sensors and provides actionable information and feedback to users. Along with data visualization and alarm notifications, CEMS stores sensor data, alarm events and audit logs for compliance reporting.

## Compatible with Setra & 3rd Party Sensors

CEMS software accepts inputs from both Setra and 3rd party sensing hardware. Regardless of if your application has existing hardware installed or if you are building a new facility, CEMS can receive and analyze your data.

## Monitor Limitless Parameters

Designed to be adaptable, CEMS can easily accommodate site specific needs. There is no restriction on what parameters can be monitored with CEMS, but the most common include: pressure, %RH, CO<sub>2</sub>, particle counts, ACH, door status and door counts.

Pressure

Temperature

Velocity

Door Sensor

Particle Sensing

Humidity
